

There will be Road work on Twin Lake Road from HWY 77 to County Road A, Sandy Beach Road, and Filter Bay Road.

This will tentatively take place Monday 9/10/18 through Wednesday 9/12/18. These dates are dependent on weather and other factors. Please watch the Town of Round Lake website for updates on the dates of the work. <http://www.townofroundlakewi.org/>

We will be placing a fog seal over the top of the road that was scrub sealed in July. A fog seal consists of spraying a light application of fog oil which is diluted with water on to the road. This typically takes 1-2 hours to dry depending on weather conditions and shade which will extend that dry time. We will be doing half of the road at a time so the roads will not be closed but expect traffic delays. If you need to cross the fog oil to get out of your driveway that is perfectly fine just go slow as you cross and as you go through the work zone.

When the fog oil is fresh/wet it will be a brownish color. As it dries it turns black.

Alternate routes are encouraged if possible. If not possible expect delays in the work zone. Flaggers will be set up on the ends of the work zone.

The foreman running the job while it is being done is Steve Amos if you need to talk to someone that day.
